ABOUT THE SPEAKERS

Dr Tang Tjun Yip

Dr Tang is a former Senior Consultant at SGH's department of vascular surgery. He helped establish the vascular service at Sengkang General Hospital and co-founded the Society of Vascular and Endovascular Surgery of Singapore.

He utilizes advances in minimally invasive techniques and technology to treat severe peripheral artery disease and is highly sought after for his opinions on complex redo and hybrid vascular cases.

Dr Tang is accredited as a Certified Wound Specialist Physician by the American Board of Wound Management and has managed a few of the more severe diabetic foot complications involving gangrene and wound infection. He uses advanced tissue therapies involving topical oxygen and wound care innovations to achieve ideal clinical outcomes.

Dr Julian Wong

Dr Wong is a former appointed consultant and senior consultant surgeon at the NHS in UK and NUH respectively. He served as NUH's Head of Division of Vascular and Endovascular Surgery. He was also Director of the National University Heart Centre Singapore Aortic Centre, where he led a group of cardiovascular surgeons in treating various aspects of aortic disease covering aortic dissections, and thoracic and abdominal aneurysms using open, hybrid, and endovascular approaches.

His specialty interests are aortic surgery (complex, open, EVAR, TEVAR, FEVAR), open venous and endovenous surgery, renal access surgery, arteriovenous malformation, carotid surgery, diabetic foot, thoracic outlet syndrome, onco-vascular surgery, and complex redo vascular surgery.
